**City Engineer's Department,
war damage records**

1939-1968

Historical Background: Created by the City Engineer's Department of the City and County of Kingston upon Hull during the Second World War and up to 1968.

Custodial history: The majority of this collection was inherited by Hull City Archives when it was created in 1967. The records were transferred from the Guildhall basement.

Description: These records include lists and receipts for personal belongings recovered from damaged properties and returned to the owners, records of furniture removal and storage, and the use and sale of salvaged materials.

The item titles have been taken from the front of each file. The files have been kept in their original order and are not, therefore, in strict chronological order.

Extent: 25 boxes

Related material: Hull History Centre has a considerable number of records relating to the Second World War. Please refer to the source guide for more information.

Access Conditions: Access will be granted to any accredited reader
