C BRE/6	<p>Assizes of Bread under 31 George II, chapter 29: An act for the due making of bread; and to regulate the price and assize thereof; and to punish persons who shall adulterate meal, flour, or bread.</p> <p>The importance of grains as a staple in the human diet is reflected by the number of laws regulating the sale and milling of grains and of bread production. The earliest English legislation regulating the price of bread, dates from the 51st year of reign of Henry III (1266). In force--at least in principle--for six centuries, the statute fixed the size, weight and price of loaves, in relation to the price of wheat.</p> <p>The Assize was first enacted at a time when there was little trade in wheat; farmers grew just enough for their immediate neighborhoods. From year to year there could be great fluctuations in price depending on the harvest. Unscrupulous bakers could have increased the price of bread out of proportion to rising price of grain, and thousands would have starved, or perhaps taken vengeance on the bakers.</p> <p>Under the 1758 Act bakers were to mark their breads with "W" for wheaten bread and "H" for household bread. This Act also addresses the practice of selling bread made with flour adulterated with alum or made with inferior flours and then sold as a better grade of bread. For these offenses bakers could be fined and have their names published in a local newspaper.</p> <p>7 volumes</p>	1758-1816
