

C TYA

ARP/CD Control and report services

1940-1946

Historical Background: The Control and Report services had many duties but their main function was to receive and co-ordinate information relating to enemy action received from wardens, police and other services; to despatch casualty and other services to incidents; and to keep Group & Regional Headquarters informed of operations and damage to special premises, road blockages and other matters affecting the movement of Civil Defence parties and troops.

Custodial history: Transferred from the Guildhall basement to the Hull City Archives when it was created in 1967.

Description: This collection holds incident files containing copies of all messages, reports and correspondence received with reference to each incident; an alphabetical index of streets showing the date and raid numbers which affected them; a register of air raid warnings showing times of warnings and all clear and notification of both to Public Cleansing, City Engineers, Broadcast Relay, Chief Warden and the Town Clerk; a register of reports of unexploded bombs, unexploded parachute mines and unexploded anti-aircraft shells; a register of messages received from the Royal Observer Corps of York relating to alarm tests and warnings with details of the duration of industrial alarms; a file of reports on unexploded bombs [1942-1946] and Alderman L. Schultz' personal files [2 files, 1941-1942]

Extent: 18 boxes

Related material: Hull History Centre has a considerable number of records relating to the Second World War. Please refer to the source guide for more information.

Access Conditions: Access will be granted to any accredited reader

C TYA/1-86

Air Raid Incident Files

**19 Jun 1940-
17 Mar 1945**

These raid files contain copies of all messages, reports and correspondence received from personnel with reference to each incident and record the type of bomb, date, time and location of incident and damage caused. Each bombing raid was given a number and all incidents for a particular raid are contained within a file(s) relating to that raid. For instance, all incidents which occurred during the night of June 19th/20th 1940 can be found within the Raid 1 records at C TYA/1.

The covering dates refer to the date of the raid but in some instances the files contain ongoing correspondence from incidents from earlier raids. In these cases the dates of the correspondence are included in the description.
